FAX your HIV letter to ONE 086 231 0825 or email to sdgt@telkomsa.net

Dear SCOAN HIV prayer line applicant

Please note there are very specific requirements SCOAN has for you to be approved to be in the HIV healing line. Please take care and take time to read this information properly to ensure you only go once to the hospital to obtain the correct report. Do it first time correct also to save money, time and costs.

LANCET LABORATORIES

Two tests are needed:

- 1) First test with 4th generation HIV-1/2 ELISA test CODE number is **H455**
- 2) **Second repeat testing** on a second blood sample is needed before final confirmed HIV diagnoses can be done. The result of the second test will show CONFIRMED. Test again with 4th generation HIV-1/2 ELISA test CODE number is **H455**
- 3) The Lancet agent must LINK the two results together to get the correct report that show on one report both test batches and dates taken. If it is not linked it will state "Repeat testing on a separate sample is required before a diagnosis of HIV infection can be done." This must NOT show on your report.

The report you send must be after the second test were done and CONFIRMED HIV Status.

SCOAN accept only the following:

1. clearly indicating your all your full **name and surname** as per **PASSPORT**
2. be on Lancet Laboratories **letterhead**
3. be **stamped** by Lancet Laboratories (doctors stamps are not accepted)
4. be **signed** by Lancet Laboratories
5. indicate that it is HIV **confirmatory** or **final report** (not CD count or reactive results)
6. state that you were "**tested and confirmed**" to be HIV positive
7. be an **original** document
8. be **typed** and NOT hand written,
9. NOT be older than three months,
