Must be Signed

FAX your HIV letter to **086 231 0825** or email to **sdgt@telkomsa.net**

Dear SCOAN HIV prayer line applicant

Please note there are very specific requirements SCOAN has for you to be approved to be in the HIV healing line. Please take care and take time to read this information properly to ensure you only go once to the hospital to obtain the correct report.

H I V ELISA CONFIRMATORY TEST IN GOVERNMENT LABORATORY HOSPITAL

Government hospital laboratory: SCOAN do not accept a medical letter and blood test results from your private doctor. SCOAN only accept a letter on the letterhead from an official Government hospital laboratory.

H I V ELISA SCREENING TEST: The Government hospital will first do a Elisa "screening" blood test, this is a screening test and the results (if positive) will state that it is subject to confirmation which is needed as well.

H I V ELISA CONFIRMATORY RESULTS: Thus the screening test is not yet complete because the Scoan requirement is HIV Elisa Confirmatory test. What is needed is that you will have to go for confirmation of the screening results at the same Government Hospital and submit the confirmatory results.

GOVERNMENT HOSPITAL LABORATORY HIV LETTER: After the Elisa confirmatory results the Hospital can issue you a letter that state you are confirmed HIV positive with your name and surname and the type of HIV you have. Stamped and signed.

What you need to submit to me:

- 1) **H I V ELISA CONFIRMATORY RESULTS**
- 2) **GOVERNMENT HOSPITAL LABORATORY HIV LETTER MUST BE:**
 1. be on Government hospital letterhead
 2. be an **original** document
 3. be **typed** and NOT hand written.
 4. NOT be older than three months.
 5. indicate that it is HIV confirmatory or **final report**,
 6. clearly indicating your full **name and surname**,
 7. state that you were "**tested and confirmed**" to be HIV positive
 8. clearly indicating the **type** of HIV you have e.g. HIV 1, HIV1& 2 or HIV1, 2&3,
 9. be **stamped**
 10. be **signed**
