Test	Result	Reference
> HIV-1/2 (4th Gen)	REACTIVE	**
> HIV-1/2 (4th Gen) Confirm	REACTIVE	**
> COMMENT: HIV PROFILE		

This is a REACTIVE result. The testing protocol for HIV-1 and -2 in people over the age of 18 months comprises an initial 4th generation immunoassay that detects both p24 antigen and antibodies, followed by a second 3rd or 4th generation immunoassay. An HIV-1 viral load on _____ collected on 25 Apr 2015 was 2821 copies/mL. This result confirms infection with HIV-1.
